APP. DIRECT

## **APPENDIX DIRECT**

## Appendix DIRECT

### DIRECT ACCESS AGREEMENT FOR LOCAL DIRECTORY ASSISTANCE LISTINGS

This Appendix sets forth the terms and conditions under which SWBT provides electronic access to its Directory Assistance database.

#### I. Service

Direct Access allows LSPs access to SWBT's Directory Assistance ("DA") database (which includes residence, business, and government listings) for the sole purpose of providing voice DA to LSP's end user. This service shall allow the LSP to obtain listed name, address, zip code and telephone numbers, except that access to non-published telephone numbers is not allowed. SWBT will provide LSPs nondiscriminatory access to the same directory listing information available to its own directory assistance operators.

LSP may receive Direct Access from SWBT's host switches, which are located in St. Louis, Oklahoma City, Dallas, Houston, Kansas City, Little Rock, Ft. Worth and San Antonio, for Options 1 and 2 below. Option 3 is available only for SWBT's host switches in Dallas, Houston, Oklahoma City or St. Louis. LSP may use the following three options to receive Direct Access:

- A. Option 1, a diagram of which is attached as Exhibit I, allows the LSP to provision an Operation Service Center ("OSC") with Direct Access from SWBT's Traffic Operator Position ("TOPS") switch. With this access method, LSP shall equip itself with Nortel Multi-Purpose Positions ("MP") or Nortel MPX positions. Option 1 shall allow the LSP Operator to release the DA call to a SWBT audio system, the Nortel Interactive Voice System ("IVS").

Option 1A, a diagram of which is attached as Exhibit 1A, makes available the LSP who chooses to install MPX-1WSS operator workstations, additional SWB TOPS switch Open Position Protocol (OPP) software will be required in St. Louis, Kansas City, Ft. Worth and Little Rock. (Note: The OPP software exists in the other Host switch sites). The OPP software, ASN routers (at the OSC and the D1 engine location), Sync and Token Ring Cards will be provisioned by SWB and the LSP will bear the cost of this hardware and software, plus the appropriate Engineering, Furnish and Installation (EF&I) charges incurred by SWB. The serving D1 engine location will require, in increments of 120 MPX-1WSS LSP Operator workstations, two Asynchronous Routers (ASN), with Sync and Token Ring cards. Each pair of ASN Routers will support up to 6 Token Rings. Each Token Ring supports up to 20 MPX-1WSS workstations.

- B. Option 2, a diagram of which is attached as Exhibit II, allows the LSP to receive Direct Access via a LSP owned DMS200 TOPS Host switch, a LUCENT 5ESS OSPS switch or any other Operator Services switch type with Call Processing Data Link ("CPDL"). CPDL is a proprietary, licensable interface that utilizes a standard format message protocol for transport of messages between Directory One Call Control and a switching entity. CPDL provides the protocol by which the LSP switch may provide audio and offer DACC.
- C. Option 3, a diagram of which is attached as Exhibit III, allows the LSP to receive Direct Access through the Electronic White Page ("EWP") node via a modem and a personal computer (PC). Details shall be provided to LSP by SWBT if this option is chosen. Switched audio capability and DACC are not available with Option 3.

## **II. Definitions**

Attachment 1, which is attached hereto, and is made a part hereof, contains definitions of terms used in this Appendix.

## **III. Responsibilities of SWBT**

- A. SWBT shall provide and maintain its own Directory One ("D1") equipment to furnish DA services to LSP for all SWBT listings.
- B. SWBT shall provide DA listings to LSP from its current DA records and in accordance with SWBT's methods, practices, and procedures.
- C. For Option 1, the SWBT host switch shall distinguish and route the call to the LSP's OSC.
- D. When Option 1 is used, SWBT shall produce Bellcore standard Automated Message Accounting ("AMA") billing records for the LSP to use in billing the end user for the DA call.
- E. SWBT shall provide access to the same listing information to the LSP that is available to its own operators.
- F. SWBT shall maintain the same level of system performance to the LSP, as it provides to itself.

## **IV. Responsibilities of LSP**

- A. LSP shall furnish in writing, a request for DA services to SWBT thirty (30) days in advance of the date when the services are to begin.

- B. When Option 1 is selected, LSP shall acquire, at its own expense, its own TOPS MP or MPX positions and provision its OSC from the appropriate SWBT's TOPS Host switch for LSP's serving area. SWBT shall provision the ASN Routers (with sync and token ring cards) at the D1 Network Interface. The LSP will bear the cost of all hardware and software it acquires for this Option, and shall reimburse SWBT for the ASN Routers, plus Engineering, Furnish and Installation ("EFI") charges.
- C. When Option 1 is chosen, the LSP shall provide voice and data circuits from the serving SWBT's host switch to the LSP's OSC.
- D. When Option 2 is chosen and LSP utilizes a switch other than those specified in TR-BX.25, the LSP must obtain CPDL/D1 certification of their switch from NORTEL. The LSP shall bear all costs of obtaining certification including payment of any applicable license fees from Nortel. SWBT shall supply D1 hardware and software i.e., (two Adax cards per 9,000 Busy Hour calls) to provision Option 2. SWBT shall bear the cost of this hardware and software, but the LSP will be responsible for EFI charges.
- E. The LSP shall only access Option 3 through an X.25 network.

**V. Responsibilities of Both Parties**

The Party providing the circuit between LSP's office and SWBT's office shall make such circuits available for use in connection with the DA services covered herein. When the total traffic exceeds the capability of the existing circuits, additional circuits will be provided by the LSP. If additional ADAX cards and ASN Routers (with sync and token ring cards) are necessary, they will be provided by SWBT, and LSP will reimburse SWBT for the cost, plus EFI.

**VI. Billing**

SWBT shall bill Options 1, 1.A., and 2 in accordance with SWBT's IBIS system. SWBT shall bill Option 3 through a Mechanized Special Bill Process.

**VII. Use of Subscriber Information**

- A. LSP is authorized to use the subscriber listing information accessed and provided pursuant to this Appendix only for providing voice DA services.

**VIII. Assignment**

The subscriber listing information shall remain the property of SWBT. LSP shall not download, store, print or otherwise extract the DA listing information made available through direct access nor shall the LSP authorize any other company or any person to use any

subscriber listing information for any purpose. Each party shall take appropriate measures to guard against any unauthorized use of the listings provided to it hereunder, whether by the other party, its agents or employees.

**IX. Term of Appendix and Rate Regulation**

Upon LSP's request, and pursuant to the terms and conditions herein, SWBT will set rates and other appropriate criteria for provision of Direct Access to LSP under the procedures outlined in Appendix Network Element Bona Fide Request.

The following types of rates shall apply to Direct Access, and shall be finalized, and actual rates shall be set by individual case basis procedures.

**A. Service Establishment**

LSP shall pay a Direct Access Service Establishment Charge (a non-recurring charge) applied at the time a LSP orders Direct Access.

**B. Direct Access Database Service**

LSP shall pay a Direct Access Database Service rate which provides for database security and administration, and ongoing support, be assessed as a monthly recurring charge.

**C. Direct Access Per Search**

LSP shall pay a Direct Access Per Search charge for each LSP request for a subscriber listing from SWBT's listing database.

## **ATTACHMENT 1 DEFINITIONS OF TERMS**

As used herein, the following terms  
shall be defined and set forth below:

**Automated Message Accounting (AMA)** - Billing detail recordings in the switch.

**Call Processing Data Link - CPDL**

**Data Terminating Equipment ( DTE)** - A terminal attached to a data network as an end user node.

**Digital Multiplexing Switch (DMS 200)** - DMS performs base call processing functions and supports service capabilities.

**Directory Assistance Call Completion (DACC)** - DACC is a service that provides customers the option of having their local or intraLATA calls automatically completed when they request a telephone listing from the DA operator.

**Directory One (D1)** - D1 offers directory search applications built on a standard operating software environment.

**Directory One Call Control** - Allows bi-directional call control capability between the TOPS switch and the D1 network.

**Electronic White Pages (EWP)** - EWP allows telephone companies to offer fully customized electronic directory assistance services for all types of users.

**Interactive Voice System (IVS)** - Peripheral off the switch that provides interactive audio.

**Multi Purpose Position (MP or MPX)** - Operator Workstations.

**Non-Published Number** - A telephone number that at the request of the telephone subscriber, is neither published in a telephone directory nor provided by a SWBT DA operator.

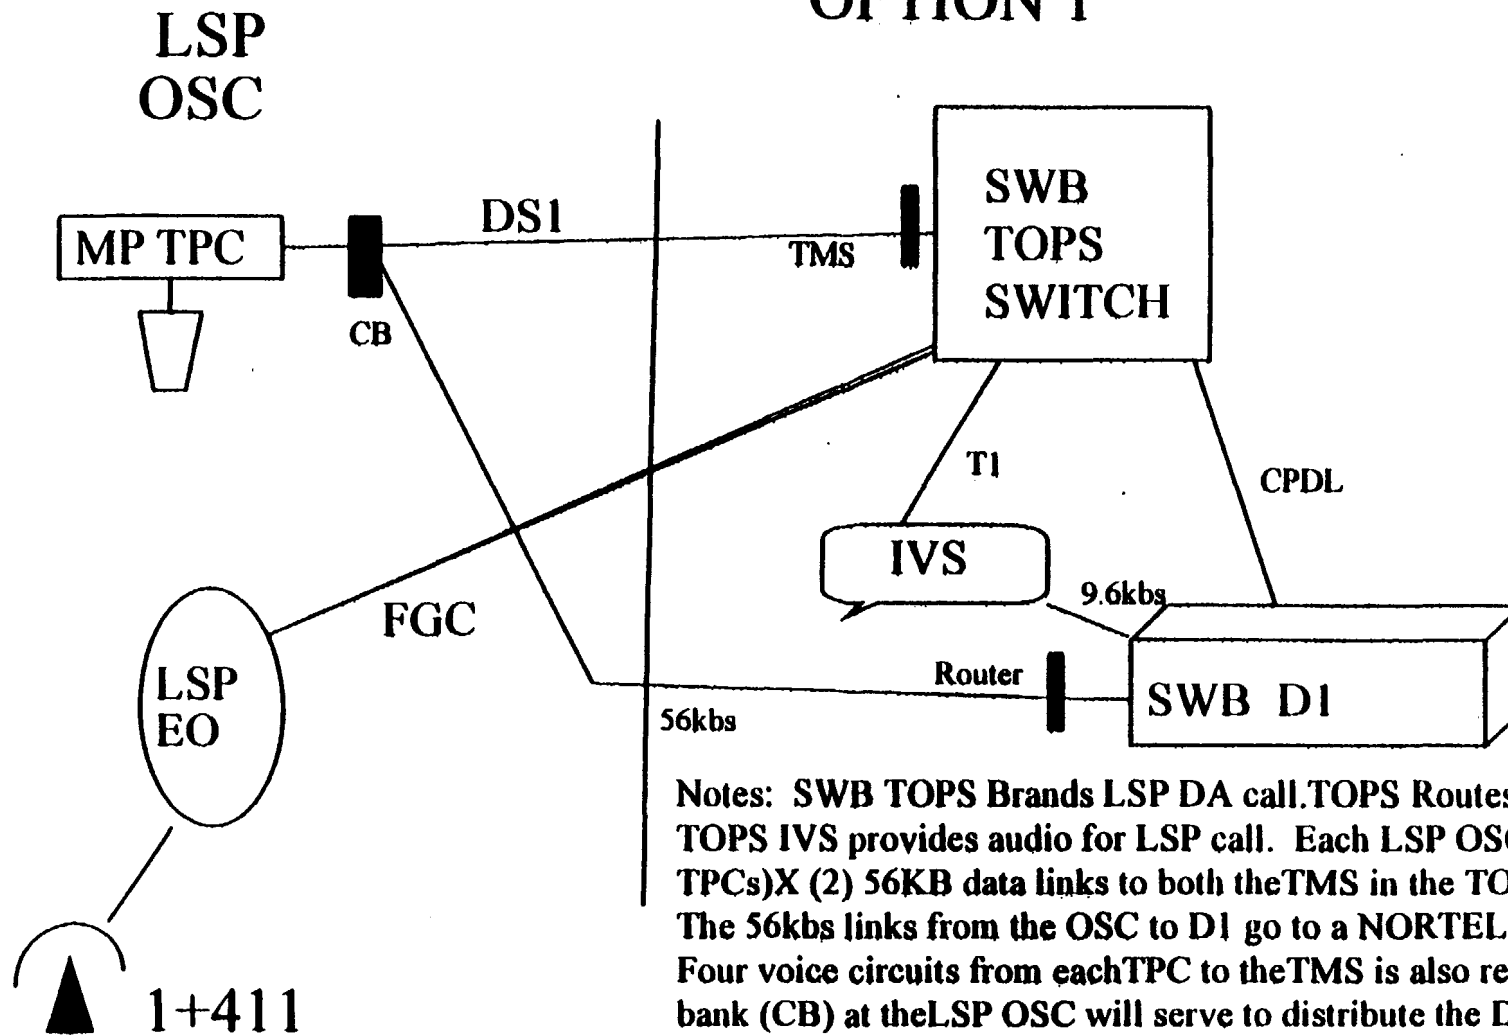

**Operator Service Center (OSC)** - Physical location of the Operators/workstations.

**Published Number** - A telephone number that is published in a telephone directory and is available upon request by calling a SWBT DA operator.

**Queue Management System (QMS)** - Supports up to 255 unique queues on calls to operator positions.

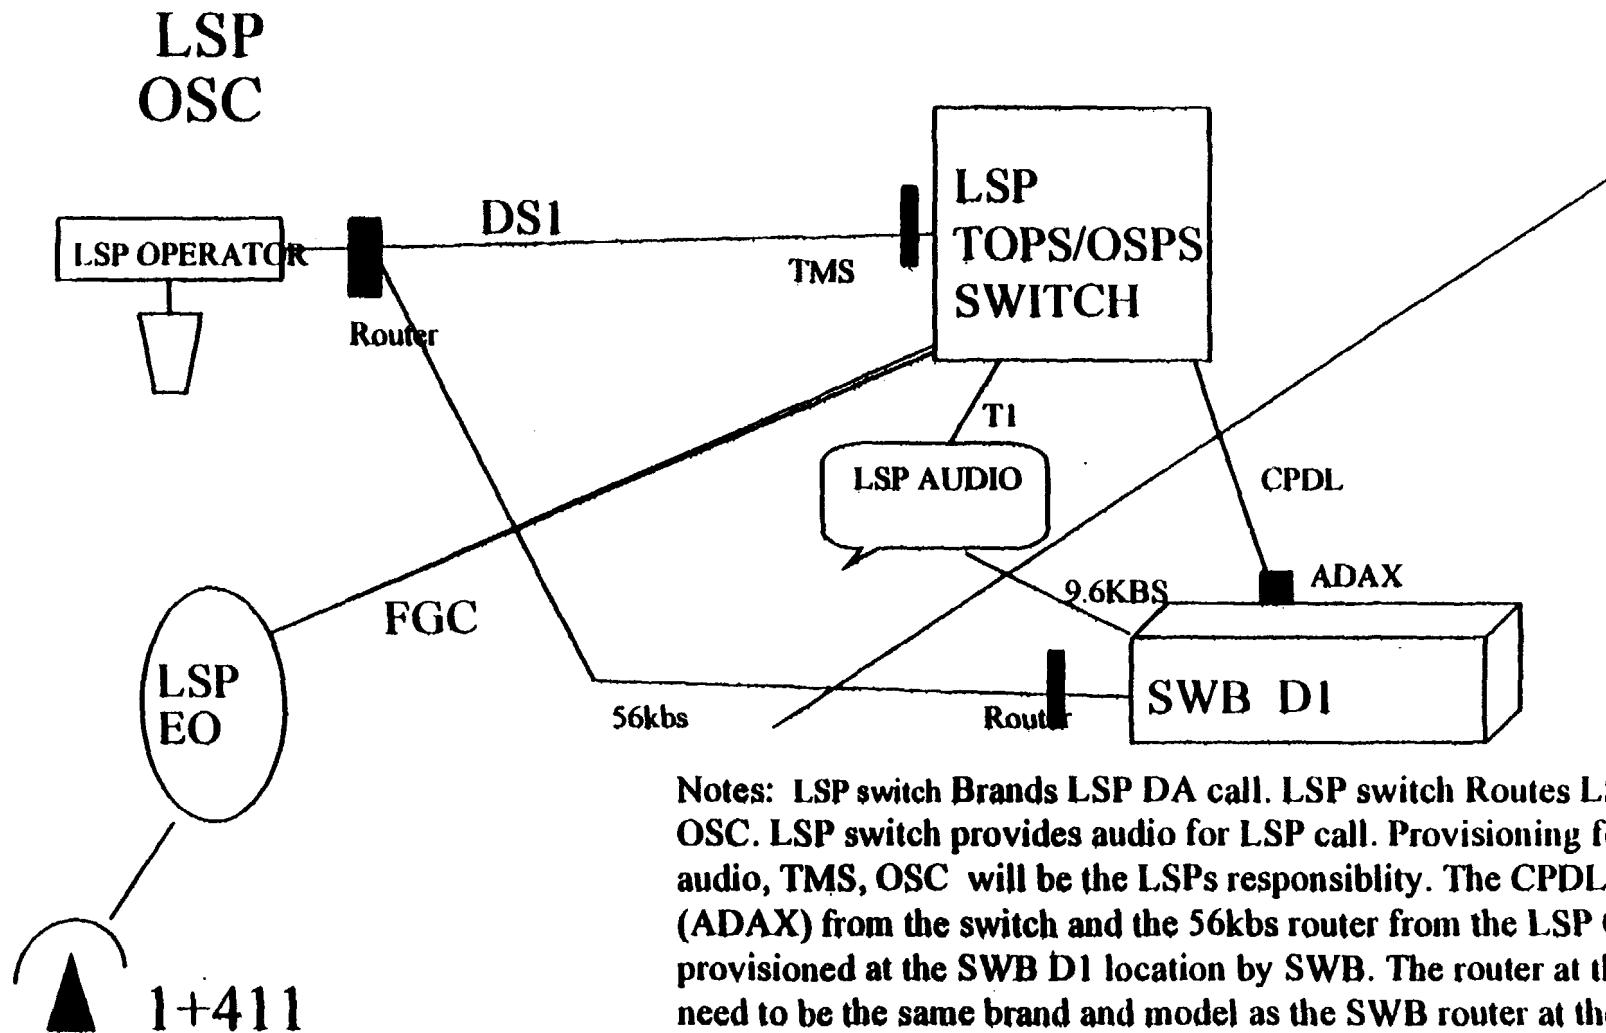

**Traffic Operating Position System (TOPS)** - Performs base call processing functions and support service capabilities.

# DIRECT ACCESS TO DA LSP OSC OPTION 1

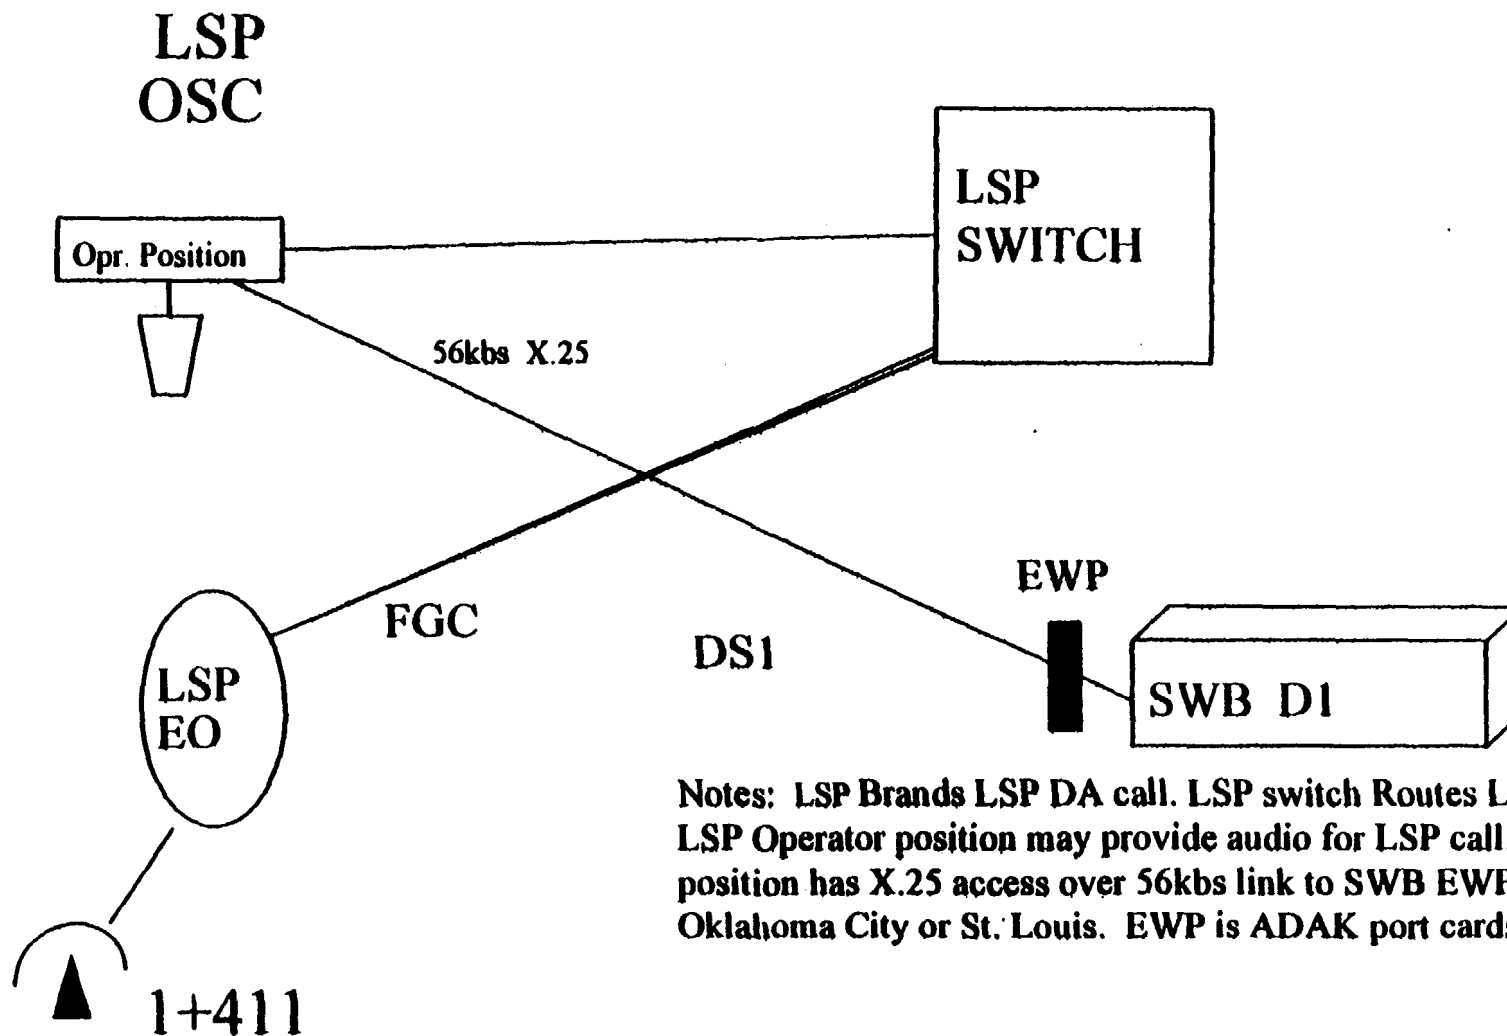

Notes: SWB TOPS Brands LSP DA call. TOPS Routes LSP Call to LSP OSC. TOPS IVS provides audio for LSP call. Each LSP OSC has (the number of TPCs)X (2) 56KB data links to both the TMS in the TOPS switch and to D1. The 56kbs links from the OSC to D1 go to a NORTEL router to get to D1. Four voice circuits from each TPC to the TMS is also required. The channel bank (CB) at the LSP OSC will serve to distribute the DSOs to the OSCs individual TPCs. Each TPC supports 4 MP positions.

# DIRECT ACCESS TO DA LSP SWITCH ACCESS OPTION 2

Notes: LSP switch Brands LSP DA call. LSP switch Routes LSP Call to LSP OSC. LSP switch provides audio for LSP call. Provisioning for the LSP switch, audio, TMS, OSC will be the LSP's responsibility. The CPDL connections to D1 (ADAX) from the switch and the 56kbs router from the LSP OSC will be provisioned at the SWB D1 location by SWB. The router at the LSP OSC will need to be the same brand and model as the SWB router at the SWB D1.

# DIRECT ACCESS TO DA NON-SWITCH EWP ACCESS OPTION 3

Notes: LSP Brands LSP DA call. LSP switch Routes LSP Call to LSP OSC. LSP Operator position may provide audio for LSP call. LSP Operator position has X.25 access over 56kbs link to SWB EWP in Dallas, Houston, Oklahoma City or St. Louis. EWP is ADAK port cards and software.
